Journal of Engineering Mathematics

Vol. 39 Nos. 1–4 March 2001

Special Issue on Practical Asymptotics

Edited by: H. K. Kuiken

H. K. Kuiken: Editorial announcement v

H. K. Kuiken: Practical asymptotics 1–2

C. Pozrikidis: Shear flow over a particulate or fibrous plate 3–24

E. Cumberbatch, H. Abebe and H. Morris: Current-voltage characteristics from an asymptotic analysis of the MOSFET equations 25–46

S. Bhattacharyya, S. C.R. Dennis and F. T. Smith: Separating shear flow past a surface-mounted blunt obstacle 47–62

G. A. Kriegsmann and J. Luke: Microwave joining of two long hollow tubes: an asymptotic theory and numerical simulations 63–78

S. Gueron and N. Liron: Fast computation of limit cycles in an industrial application 79–86

J. R. King and S. M. Cox: Asymptotic analysis of the steady-state and time-dependent Berman problem 87–130

M. Landrini and P. A. Tyvand: Generation of water waves and bores by impulsive bottom flux 131–170

L. W. Schwartz: On the asymptotic analysis of surface-stress-driven thin-layer flow 171–188

A. E. P. Veldman: Matched asymptotic expansions and the numerical treatment of viscous-inviscid interaction 189–206

J. D. Fehribach and A. M. J. Davis: Stokes flow around an asymmetric channel divider; a computational approach using matlab 207–220

H. G. Kaper and H. Nordborg: The frozen-field approximation and the Ginzburg-Landau equations of superconductivity 221–240

S. W. Rienstra and T. D. Chandra: Analytical approximations to the viscous glass-flow problem in the mould-plunger pressing process, including an investigaton of boundary conditions 241–259

R. Klein, N. Botta, T. Schneider, C. D. Munz, S. Roller, A. Meister, L. Hoffmann and T. Sonar: Asymptotic adaptive methods for multi-scale problems in fluid mechanics 261–343

A. D. Fitt and C. P. Please: Asymptotic analysis of the flow of shear-thinning foodstuffs in annular scraped heat exchangers 345–366

S. J. Preece, J. Billingham and A. C. King: The evolution of travelling waves from chemical-clock reactions 367–385
